

AI vibe coding statement to recreate the Option C same page as shown:

 Prompt for Recreating Option C (Friendly, Soft UI)

You are building a mobile application called Gym Bro.

Do NOT change structure, navigation, or functionality.

Only implement the visual style and layout described below.

The app is a single-user habit reminder app that prompts users daily about gym attendance. It does NOT track workouts, reps, or social features.

 Device Context

- Mobile-first layout
 - Vertical rectangular phone layout
 - Compact spacing similar to a condensed iPhone screen
 - Everything should fit within a single viewport without excessive scrolling
 - Clean, centered layout
-

 Screen Structure (Must Match Exactly)

Top App Bar

- Centered title: “Gym Bro”
 - Below it: “← Back” aligned left
 - Page title: “My Schedule”
-

Content Area

Two stacked schedule cards:

Card 1

- Title: “Scheduled Workout Time (Today, Feb 23rd)”

- Subtext: “Time: 3:10PM – 5:00PM”

Card 2

- Title: “Scheduled Workout Time (Tomorrow, Feb 24th)”
- Subtext: “Time: 11:00AM – 12:30PM”

Primary Button (Centered)

“Edit Gym Schedule”

Bottom Navigation Bar

Three evenly spaced tabs:

- Attendance
- Schedule (active)
- Settings

Highlight the active tab visually.

Visual Style – Option C (Friendly, Soft, Approachable)

This is extremely important.

Overall Feel

- Warm
- Encouraging
- Non-intimidating
- Soft
- Beginner-friendly
- Calm habit-building energy

Avoid:

- High contrast neon

- Harsh shadows
 - Aggressive typography
 - Sharp corners
-

Color Palette

Background: Warm off-white

#FAF7F2

Primary Accent (Buttons, active states):

Soft green

#7BC47F

Card Background:

Very light green tint

#E8F5E9

Bottom Nav Background:

#F1F8F4

Text:

- Primary text: dark gray (not pure black)
- Secondary text: muted gray

No pure black backgrounds.

Buttons

Primary Button:

- Rounded corners (pill style or 16–20px radius)
- Soft green background
- White text
- No harsh borders

- Subtle soft shadow (very light)
- Slight hover/tap darken effect

Avoid sharp rectangles.

Cards

- Rounded corners (16–20px radius)
 - Light green tinted background
 - Subtle shadow
 - Soft internal padding
 - No heavy borders
 - Clean spacing between cards
-

Typography

Use friendly rounded sans-serif style (examples):

- Nunito
- SF Rounded
- Poppins (light/regular)

Hierarchy:

- App Title: Medium weight
- Page Title: Semi-bold
- Card Title: Medium
- Subtext: Regular, slightly muted

Avoid bold-heavy UI.

Spacing Rules

- Compact but breathable

- Small vertical spacing between elements
 - Consistent padding inside cards
 - Center primary button horizontally
 - Bottom nav fixed at bottom
-

✨ Micro-Details

- Highlight “Schedule” tab subtly (soft green text or background)
 - Gentle shadow under cards
 - No thick borders
 - Slight elevation effect on primary button
 - Overall aesthetic should feel like a wellness app, not a hardcore fitness tracker
-

🚫 Important Constraints

Do NOT:

- Add new features
- Add analytics
- Add workout tracking
- Add social elements
- Change navigation structure
- Change screen hierarchy

This is purely a visual implementation of the provided layout.

🧠 Design Intent

This app is for casual gym-goers who struggle with consistency.

The UI should:

- Reduce guilt

- Reduce intimidation
- Encourage routine
- Feel supportive
- Feel simple
- Feel calm and repeatable

If possible, structure the output using reusable components (Card, PrimaryButton, BottomNav, AppHeader).
